Semi Automatic Twin Tub Washing Machine

- Understanding the Semi Automatic Washing Machines
- Semi automatic washing machines have two tubs - one for washing and one for drying. A semi automatic washing machine uses manual washer to dryer transfer. The top load semi automatic washing machine takes the laundry from an entry port on the top side of the machine. This makes the Voltas Beko semi automatic washing machine not just economical but also comfortable to use.
- Benefits of Voltas Beko Semi Automatic Washing Machines
- Voltas Beko washing machines, not only use less water but also save considerably on the price as they're much more economical than the non semi automatic washing machines. Saving the environment and money - that's the promise of Voltas Beko semi automatic washing machines.
- Washing Capacity
- These washing machines are available for purchase in 6.5 kg to 8.5 kg capacities. There is always a Voltas Beko semi automatic washing machine with dryers for you no matter the size or need of your family.
